1000 ORANDUM FOR THE RECORD

SUBJECT: Description of DD/S&T Activities to PFIAB by ... Dr. Albert D. Wheelon

- 1. In opening the meeting, the Chairman, Mr. Clifford, indicated that the Board had a particular and pressing interest in the NRP. He requested Dr. Wheelon to describe the background of the NRO, and comment upon its workability rather than proceeding with the presentation which he had prepared. Dr. Wheelon pointed out that he had advised Admiral Raborn not to sign the extant NRO Agreement, but had agreed wholeheartedly to support it if Admiral Raborn did accept the agreement. In view of this situation, Dr. Wheelon said he would prefer not to discuss this subject unless Admiral Raborn could be present. The Chairman then stated that the Committee was very concerned because they had now heard the principal participants in the program both state that they felt that the organization was unworkable in its present form. Mr. Clifford referred to a presentation by Dr. McMillan as acrimonious in part, and said that Dr. McMillan felt the agreement left too much to negotiation. Mr. Clifford then pointed out the vital position of the program. in the national intelligence effort, and indirectly urged Dr. Wheelon to address the question. Again Dr. Wheelon deferred, but he indicated that he would be available at the Committee's convenience to address this subject after Admiral Raborn had been contacted.
- 2. Mr. Clifford indicated that it would be appreciated if the presentation could be limited to approximately one half hour in order to allow the Committee time for consideration of other pressing matters in Executive Session.
